

Jerusalem Red

Exterior Usage: Suitable for cladding and paving in non-freezing conditions only.	Durability: Suitable for most commercial and/or high traffic areas.	Usage in wet conditions: Spalling and cracking may occur in case of access humidity or still water underneath the stone.
Color Range 	Other names: Slaib Stone Type: Dolomite Quarry Location: Jerusalem	Special Notes: <ul style="list-style-type: none">● Might contain dry seams, pits, fossils and glass veins- all of which are inherent characteristics of the stone and are filled at the factory during production. Since these voids may sometimes lose their fillings, they should be refilled as a part of standard maintenance.● This stone contains deposits of minerals that may react to moisture. Caution should be taken in installations where this material is exposed to standing or running water which may result in spalling on the face of the stone.● Application of a sealer is recommended. (Note: It is advised to apply a sealer prior to grouting.)
